DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hofsaess et al. in view of Newton et al.

Hofsaess et al. teach an electrohydraulic brake system for motor vehicles of the 'brake- by-wire' type including a hydraulic pressure source that can be actuated by means of an electronic control unit and is comprised of a hydraulic pump (7) driven by an electric motor and a high-pressure accumulator (13) adapted to be recharged by the pump. However, Hofsaess et al. do not teach wherein a means is provided for monitoring the hydraulic delivery rate of the pump and determining quantities of gas or air at the suction side of the pump based on the monitored hydraulic delivery rate.

Newton et al. teach a means is provided for monitoring the hydraulic delivery rate of the pump and determining quantities of gas or air at the suction side of the pump based on the monitored hydraulic delivery rate. (Figure 1, Column 1, lines 23-26) It would have been obvious to one of ordinary skill in the art at the time the invention was made to determine quantities of gas or air at the suction side of the pump in order to optimize operation of the system.

Response to Arguments

3. Applicant's arguments with respect to claims 15-28 have been considered but are moot in view of the new ground(s) of rejection.
